## Company Description

Grant Industries is a privately owned company involved in the research, development, manufacturing, and marketing of specialty chemicals for the cosmetic, personal care, textile, and printing industries. Four generations of the Granatell family have operated the company for over 60 years. The cosmetics division was launched in 1977. The R&D lab is staffed with experienced scientists and formulators responsible for many leading and innovative products. Main product categories include: Polysilicone-11 elastomers, silicone/active powders, microsphere powders, UV dispersions, specialty silicone fluids and formulated cosmetic ingredients. Many new products and formulas are specifically designed to custom deliver an active ingredient or showcase an aesthetic quality. Grant Industries serves all major global cosmetic markets with emphasis on quality products and service. Additional information on the company and its products are available on the web site.
